Macarons è una versatile collezione di rubinetteria tre fori capace di interpretare al meglio le necessità dei singoli utenti e dei mercati di riferimento. Abbiamo scomposto la maniglia in 3 differenti elementi sovrapponibili, appunto come i macarons, affinché i singoli layers potessero comporsi tra di loro in un "mix and match" di materiali e finiture.

Macarons is a versatile collection of three-hole taps able to best interpret the needs of individual users and the reference markets. We have broken down the handle into 3 different overlapping elements, just like the macarons, so that the individual layers could be composed together in a "mix and match" of materials and finishes.

Macarons est une collection polyvalente de robinets à trois trous capables d'interpréter au mieux les besoins des utilisateurs et des marchés de référence. Nous avons divisé la poignée en 3 éléments différents qui se chevauchent, tout comme les macarons, afin que les couches individuelles puissent se composer dans un "mix and match" de matériaux et de finitions.

Charm è la nostra interpretazione del rubinetto a miscelazione assiale. La leva concentrica fluttua nel vuoto acquisendo così forza ed esclusività, un dettaglio prezioso che caratterizza la collezione.

Charm is our interpretation of the axial mixing tap. The concentric lever floats in the void thus acquiring strength and exclusivity, a precious detail that characterizes the collection.

Charm est notre interprétation du mitigeur axial. Le levier concentrique représente une force dans le vide acquérant ainsi une certaine exclusivité, un détail précieux qui caractérise cette collection.
